## Abstract of the Disclosure

A method for making a compound of formula (I)

wherein bonds a and b are single or double bonds, provided that one of a and b is a single bond and the other is a double bond; one of B¹ and B² is —CHR⁵-CHR⁶-C(Y)ZR⁻, —CR¹⁰R¹¹-NHR¹² or hydrogen and the other is absent; B³ is —C(W)NHR® or hydrogen; provided that one of B¹, B² and B³ is not hydrogen; Y and W are O or S; Z is O, S or NR⁰; R⁵ is hydrogen or C¹-C₄ alkyl; R⁶ is hydrogen or C¹-C₄ alkyl; R⊓, R⁰, R¹⁰ and R¹¹ are independently hydrogen, alkyl, alkenyl, aryl or aralkyl; and R® and R¹² independently are alkyl, alkenyl, aryl or aralkyl. The method comprises steps of: (a) preparing an imidazolidinethione having formula

$$R^2$$
 $R^1$ 
 $R^3$ 
 $R^4$ 

and (b) adding to the imidazolidinethione, without isolation of the imidazolidinethione, one of: (i) CHR<sup>5</sup>=CHR<sup>6</sup>-C(Y)ZR<sup>7</sup>; (ii) R<sup>10</sup>R<sup>11</sup>C=O and R<sup>12</sup>NH<sub>2</sub>; (iii) R<sup>10</sup>R<sup>11</sup>C=NR<sup>12</sup>; and (iv) R<sup>8</sup>N=C=W.
